

# VOICES OF ENGAGEMENT FROM THE ENVIRONMENT PROGRAM

I am an environment major because...

"It teaches us to see the natural world and our place in it.  
What could be more important?"

**CAMERON WYLIE**, Environmental Science, Biology Concentration

"I care about the future of the planet. An ecologically oriented education has allowed me to reconstruct my concept of community to incorporate the natural environment to which we are inextricably linked."

**ALORA MYERS**, Environmental Studies, Humanities Concentration

"I believe in protecting the natural beauty that my future holds and allowing it to flourish. Without Mother Nature, who is there to guide us?"

**MAX BOYCE**, Environmental Science, Biology Concentration

"The environmental issue at hand is one that holds immense importance in our society and has the potential to affect the entire life of the planet as we know it. I believe it is my duty to join the environmental movement."

**CONWAY LEBLEU**, Environmental Science, Biology Concentration

"Strengthening environmental awareness is as vital as the air we breathe. Reconnecting as a species with our natural environment is what we do in the environment program, and I am very grateful for all that I have learned here."

**OCEAN DIAMOND**, Environmental Science, Biology Concentration

"I have a passion to help sustain what humans did not create. If we do not, there will be numerous beings who will never have an opportunity to fulfill their purpose."

**TAYLOR BURNS**, Environmental Science, Biology Concentration

"I want to explore the world and become fearless toward it."

**MALLORY HIRSCHLER**, Environmental Sciences Major, Biology Concentration

"I wanted to save the planet. I wanted a challenge that questioned my entire existence. The Earth is the inspiration that has led me to become the person I am. I became an environmental science major to honor that fact."

**ISSY BOTTGER**, Environmental Science, Biology Concentration

"I am encouraged to think critically about environmental issues from multiple angles. Looking at specific details as well as the larger picture when working towards solutions has helped me grow as an environmentalist."

**ERIN KNOWLES**, Environmental Science, Social Science Concentration

## THE ENVIRONMENT PROGRAM AT LOYOLA

Environmental Science | Environmental Humanities | Environmental Social Sciences  
Environmental Studies Minor
